Authorization for this examiner's amendment was given via telephone by Attorney Julie Reed, Reg. No. 35349, on 2/27/2007.

The application has been amended as follows:

Art Unit: 2152

Allowable Subject Matter

8. The following is an examiner's statement of reasons for allowance:

Claims 1, 6, 11, 13, 16, and 17 as amended distinguish themselves over the prior art by delineating a communication system that takes advantage of a community service which manages and monitors its elements in order to effectuate call processing that uses objects for making and receiving telephone calls between members in different communities. With the current amendment, the applicant has clarified this functionality in the independent claims and thus claims 1, 6, 11, 13, 16, and 17 now show a patentable distinction over the prior art. Important features of the system include the ability of the community service to monitor, stop, re-start, and clone various elements of the community without requiring administrative intervention as well as the use of different types of agents in the communication system that use objects to complete telephone calls across different communities. Furthermore, the prior art gives no indication that it would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to utilize such a communication system in the fashion presented in the independent claims.

Claims 2-5, 7-9, 12, 14, and 15 are allowed due to their dependence on claims 1, 6, 11, 13, 16, and 17.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
